

EBSCO

Work smarter, not harder: How to utilise data to build an efficient library service.

Cindy Slater | Senior Customer Engagement Manger
cslater@ebSCO.com

Outline

- EBSCOadmin: Easy customisations for your EBSCO Discovery Service or EBSCOhost platform
- OpenAthens reporting: How to reports by groups and/or permission sets, also analytics

EBSCO admin: Enhance & manage your EBSCO experience

- Apply custom branding to EBSCO products
- Configure search results and display preferences
- Enable multilingual options for automatic translation
- Customize and control access to resources
- Retrieve usage statistics

EBSCO admin: Branding

- Customise colours
- Add Library logo
- Ask-a -Librarian link
- Add branding hyperlinks
- Customise the toolbar

Open Athens

- Access Management. Produced by Eduserv.
- Allows users to access multiple electronic resources without needing separate usernames and passwords for each individual vendor.
- Each user has their own unique user-name and password that allows access to multiple vendors and resources.
- Reporting options allow you to report across a number of measurable attributes

Benefits

- Simplifies access to the library's resources. Users authenticate once to all e-resources
- Granular statistics: access; sessions; accounts; permission set; user groups; date; time...
- Secure access
- Users can access e-resources from anywhere using their mobile devices or computers

THANK YOU
